Graduate Electrical Engineer

SunRice is one of the world's largest rice food companies. With operations in Australia, the USA, the Middle East, the Solomon Islands and Papua New Guinea, we lead the way in developing diverse, innovative and nutritious rice food products. Our people, at every level, are recognised and rewarded for contributing to our first-rate reputation among our consumers and retailers.

That’s why we’re keen to hear from dynamic, suitably qualified people like you to join our team. We are currently seeking applications from Graduate Engineers to work at our Leeton manufacturing site.

This is an excellent opportunity for a highly motivated and talented candidate to become involved in a successful company with opportunities to grow and develop both personally and technically. You will be working with an experienced maintenance and production team in a fully automated manufacturing environment.

The following criteria are essential for all applicants:

- Tertiary qualification in Electrical Engineering
- PLC and SCADA
- Strong understanding of process control
- Desire to be involved in continuous improvement
- Strong technical knowledge and conceptual design
- Project management experience
- Demonstrate a strong practical ability, clear communication and a motivation to see a project through to completion.
- Good written, interpersonal & communication skills

Applications in writing should be forwarded to

Leanne Sheldrick
People & Recruitment Manager
SunRice
PO Box 561
LEETON NSW 2705

Alternatively, email us your resume, including the above job title in the subject line, to:

recruitment@sunrice.com.au

All correspondence will be dealt with in strict confidence.
